

Subject Index

CS denotes centrespread illustration accompanying article
CS* denotes centrespread illustration only

- Acinetobacter* spp., biological phosphorus removal 149
Agrobacterium spp. 1
agrocins 1
AIDS
 mycoses complicating 219
 virus role 153
L-alanine, industrial production by immobilized bacteria 58
amylases, raw starch hydrolysis 21
anaerobes, metabolism of facultative and cytochrome a_1 role 175
antibodies, monoclonal in plant virology 73
antigenic variation, influenza virus 37
API ZYM strip 232
aquatic environments, metabolic activity determination 90
Aspergillus nidulans
 gene regulation 137
 genetic analysis (CS*) 197
asymmetry, role in microbial differentiation 214
Bacillus subtilis-168, genetic map (CS*) 93
bacteria
 evolutionary dichotomy 117
 plant pathogenic, molecular biology 33
 prosthecae, asymmetry and differentiation 214
 siderophores 9
 soil oligotrophic physiology 102
biological control, crown gall with agrocins 1
books reviewed
 Amino Acid Biosynthesis and Genetic Regulation edited by Herrmann KM and Somerville RL 158
 BASIC Microcomputer Models in Biology by Spain JD 184
 Biochemistry edited by Zubay G 26
 Cell Wall-Deficient Bacteria: Basic Principles and Clinical Significance by Domingue GJ 80
 Growth of the Bacterial Cell by Ingraham JL, Maaløe O and Neidhardt FC 157
 Microbial Ecology by Campbell RE 80
 Microbial Geochemistry by Krumbein WE 157
 Microbiology. Basic Principles and Clinical Applications edited by Rose NR and Barron AL 210
 Microbiology in Blood Transfusion by Barbara JAJ 157, 158
 Microbiology (Fundamentals and Applications) by Atlas RM 184
 Microbiology: PreTest Self-assessment and Review edited by Tilton RC 158
 A Modern Introduction to Food Microbiology by Board RG 184
 The Phototrophic Bacteria: Anaerobic Life in the Light by Ormerod JG 132
 Recombinant DNA Techniques: An Introduction by Rodriguez RL and Tait RC 132
 A Short Textbook of Medical Microbiology by Turk DC, books reviewed
 Porter IA, Duerden BI and Reid TMS 26
carcinogenesis, gene amplification 223
cell division, control in *Chlamydomonas* 96
Chlamydomonas spp., cell division cycle control 96
chromosome rearrangements in oncogenesis 223
cluster analysis techniques in *Penicillium* taxonomy 185
colicins
 ecological role 203
 immunity 203
 lethal action 203
 production and membrane translocations (CS) 168
crown gall 1
cyanobacteria, toxins of freshwater 48
cytochrome a_1 , facultative anaerobe metabolism 175
deuteromycetes, conidiogenesis concepts 86
diagnosis, plant viral disease, antibodies 73
differentiation, asymmetry role in microbes 214
DNA
 base sequence complementarity and fungal taxonomy 44
 mitochondrial, variation of fungal 141
 replication primer in parvovirus 163
enzyme testing system for *Penicillium* isolates 232
Escherichia coli
 immobilized, L-alanine production 58
 penicillin-binding proteins 211
 siderophore systems and molecular genetics 9
ethanol fermentation, *Zymomonas* spp. 133
fermentation, pure culture yeast in wine 159
fungi
 complicating AIDS 219
 conidiogenesis of deuteromycetes 86
 life cycles 18
 mitochondrial genomes 141
 nomenclature, rules affecting 18
 siderophores 9
 taxa definition, molecular techniques 44
gases, mass spectrometry 200
gene expression
 oncogenesis 223
 regulation in *Aspergillus nidulans* 137
genetically engineered enzymes 24, 25
genetically engineered vaccines 123
glycoproteins, influenza virus variation (CS) 37
haemagglutinin, structure of influenza 37
host defences, herpes simplex in mice 127

Subject Index, cont.

- identification, *Penicillium* spp. isolates 232
 immune regulation, reticuloendotheliosis virus 107
 immune system (CS*) 15, 67
 immunoglobulins, structure and properties (CS*) 67
 influenza virus
 antigenic variation 37
 glycoprotein structure (CS) 37
 surface antigens 37
 interferon receptors and hormone nature 81
 international rules, fungal nomenclature 18
 International Union of Microbiological Societies 27, 28

Klebsiella pneumoniae, nitrogen fixation genes 29

 β -lactams, enzyme interactions 211
 lymphocyte development (CS*) 15
 lymphoma 107

 mass spectrometry, membrane inlet 200
 membrane translocation colicins 168
 metabolic activity, *in situ* determination in aquatic environment 90
 mitochondria, genomes of fungal 141
 model, nitrogen fixation genes 29
 mycoses, *see* fungi

 neuraminidase, structure of influenza 37
 nitrogen fixation genes
 Klebsiella pneumoniae 29
 regulation 29
 Rhodopseudomonas capsulata organization 194
 nomenclature
 conidiogenesis 86
 plant virology 113
 nucleotide sequence, *Vibrio marinus* 5S RNA 229

 oncogenesis, chromosome rearrangements 223

 papilloma virus research 5
 pathogens
 AIDS 153
 microbial synergy 206
 model of virus 127
 penicillin-binding proteins 211
Penicillium spp.
 rapid identification method 232
 taxonomy problems 185
 peptide, synthetic and vaccines 55
 peptidoglycan peptide-interacting proteins 211
 phage typing, *Salmonella typhimurium* 69
 phosphorus, biological removal in wastewater 149
 phylogenetic tree, *Salmonella typhimurium* 69
 phylogeny
 prokaryote (CS) 117
 Vibrionaceae 229
 physiology
 dissolved gas monitoring 200
 red-tide microorganisms 179
 soil oligotrophic bacteria 102
 plant pathogens, molecular biology of bacterial 33

 plant virus
 helper component 191
 monoclonal antibodies 73
 non-persistent transmission 191
 species problem 113
 poisoning, animal drinking water 48
 potyvirus, helper component features 191
 precursor, yeast killer toxin 62
 prokaryote phylogeny (CS) 117
 protein
 penicillin-binding 211
 peptidoglycan peptide-interacting 211
Pseudomonas dacunhae, L-alanine production by immobilized 58

 receptor, interferon 81
 recombinant DNA, plant pathogenic bacteria 33
 red-tide, microorganism growth physiology 179
Rhodopseudomonas capsulata, nitrogen fixation gene organization 194
 RNA, 5S
 ribosomal sequence from *Vibrio marinus* 229
 sequencing and prokaryote phylogeny 117

Saccharomyces cerevisiae, genetic map (CS*) 145
Salmonella typhimurium, strain phylogeny 69
 sediments, metabolic activity determination 90
 siderophore-mediated iron, assimilation distribution 9
 siderophores, bacteria and fungi 9
 soil
 bacterial oligotrophic physiology 102
 uncharacterized bacteria 102
 species and plant virology 113
 starch, direct hydrolysis of raw 21
 synergy, pathogenic in human infections and models 206

 taxonomy
 fungal 44
 Penicillium 185
 toxins, *see also* colicins
 freshwater cyanobacteria 48
 immunity protein of yeast 62
 yeast killer, processing 62
 tubulin synthesis and *Chlamydomonas* cell cycle control 96

 vaccines
 antiviral oligopeptide 55
 genetically engineered 123
 subunit 123
Vibrio marinus, nucleotide sequence 5S RNA 229
 virus, *see also* plant
 antigenic drift and vaccines 55
 diversity and oncogenesis 5
 herpes simplex in mice 127
 host transformation 5
 influenza 37
 oligopeptide vaccines 55
 parvovirus replication 163
 reticuloendotheliosis-associated 107
 reticuloendotheliosis and immune regulation 107

Virus, cont.

- role in AIDS 153
- vaccinia 25

- wastewater treatment, biological phosphorus removal 149
- wine, pure culture yeasts 159

- Xanthomonas campestris* pv. *oryzae* 33

yeast

- killer toxin precursor processing 62
- pure culture and wine making 159

Zymomonas mobilis

- ethanol fermentation 133
- substrate range 133
